## Career Objective:

To work in an organization where I can apply my knowledge and skills to contribute to organizational goals, deliver high-quality results, and create value for the organization.

## Academic Record:

| Course | School/College | Board/University | Percentage/CGPA | Year of Passing |
|---|---|---|---|---|
| B.Tech | Buddha Institute of Technology, Uttar Pradesh | Dr. A.P.J. Abdul Kalam Technical University | 63% | 2026 |
| 12th | Abhyanand S. S. Inter College, Uttar Pradesh | U.P Board | 69% | 2022 |
| 10th | Abhyanand S. S. Inter College, Uttar Pradesh | U.P Board | 74.3% | 2020 |

## Technical Skills

- **Programming languages:** Python, C++
- **Core Concepts:** Object-Oriented Programming, Data Structures & Algorithms
- **Web Technologies:** Django Framework, HTML, CSS, Basics of JavaScript, Json
- **Machine Learning & Data Science:** NumPy, Pandas, Matplotlib, Power Bi, Scikit-Learn
- **Database:** MySQL, Oracle Database
- **Tools & Platform:** Git and GitHub, SQL Plus, VS Code

## Key Projects:

- **Live Vision - (Real-Time Object Detection Web Application)**
  Developed a real-time object detection web application using Python, Django, OpenCV, and YOLOv8 model. The application detects and classifies multiple objects from live video streams, enabling real-time monitoring, analysis, and security. It features live video processing, accurate object detection, and a responsive web interface, with the flexibility to support custom object detection and AI-based analytics.
  **Tech Stack:** Django, Python, MySQL, HTML, CSS, JavaScript, Json, OpenCV, YOLOv8 model.

- **AI Voice Assistant - (Desktop Application)**
  Developed a Python-based voice assistant that responds to user queries through voice output and on-screen text. The application utilizes speech recognition and text-to-speech technologies to process voice commands and provide real-time responses. It features accurate speech recognition, voice interaction, and an intuitive user interface, making it suitable for desktop automation and productivity tasks.
  **Tech Stack:** Python, PyAudio, Pyttsx3, SpeechRecognition, OS, Voice Processing, Desktop Application.

## Certifications & Achievements:

- **Machine Learning Internship Certificate** – Successfully completed a Machine Learning Internship at Technex'25, IIT (BHU) Varanasi (organized in association with EISystem Services) and gained practical exposure to Machine Learning concepts and applications.
- **Research Paper Publication** – Published the research paper titled **"Live Vision"** in the International Journal for Research in Applied Science & Engineering Technology (IJRASET) (ISSN: 2321-9653), highlighting the development of a real-time object detection web application.

## Area of interest:

● Sports ● Travelling ● Science ● AI & Machine Learning

## Strengths:

● Quick Learner ● Problem-Solving ● Adaptability ● Time Management

## Languages:

● Hindi (Native) ● English
